SATURN

EVOLUTION

SO YOU THINK YOU KNOW SATURN? THINK AGAIN.

Saturn Evolution – the evolution of innovations

Maple / Walnut / Maple | Birch / Walnut / Birch | Hybrid combinations |
a brand new „HALO“ Mounting System | revolutionary Design Lab features
...the birth of **Saturn Evolution**.

Shell compositions

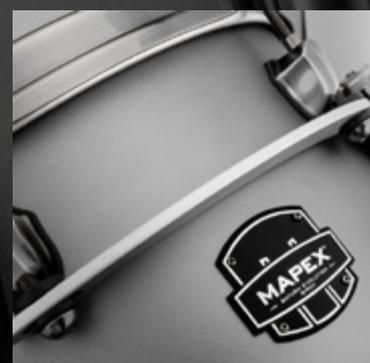

Two kinds of shell composition:

Saturn Maple: Maple/Walnut/Maple – Bright, Versatile, Open

Saturn Birch: Birch/Walnut/Birch – Dark, Punchy, Dry
Shell composition could be identified by badge on every component.

HALO Mounting System

The four diagonal supportive rubbers(contact points) on one-piece ring can release the pressure on shell more evenly, which makes shell have natural vibration and resonance.

Chamber Specific Design

Plies get progressively thicker, depths graduate by 1/2", and bearing edges change, as the drums get larger in diameter. The combination of all of these details creates an amazing symphony in one kit, where each and every drum sounds perfect!

SAS Static 90° Floor Tom Leg

The straighter the path to the floor, the more sound loss: the static 90° Design Lab leg resolves this issue, allowing the most possible resonance from the floor toms.

SAS Sonic Pedestal Foot

The steel leg is prevented from contacting the ground by an internal cotter pin, allowing the floor tom to “float” on the elevated “spring” of the rubber foot, eliminating vibration transfer and maximizing resonance.

Floor Tom Isolation Gaskets

The metal components of the floor tom brackets are entirely on the outside of the shell, isolated by the special rubber lift gasket. This releases all pressure from the shell, alleviating vibration loss.

Air Flow Venting

The venting is key to the feel and the overall resonance of the shells. Through painstaking testing, each Chamber Specific approach has led to a formula of multiple vent holes in both Design Lab systems. Toms and bass drums have different combinations of vent holes. These air flow vents are placed at the Nodal line with the lugs, so as to not affect the resonance of the shells.

SATURN

SO YOU THINK YOU KNOW SATURN? THINK AGAIN.

Saturn – perpetuate the Classic!

The iconic sound of maple/walnut shelled drums collides with revolutionary Design Lab features, perpetuating the classic **Saturn Series!**

SAS Static 90° Floor Tom Leg

The straighter the path to the floor, the more sound loss: the static 90° Design Lab leg resolves this issue, allowing the most possible resonance from the floor toms.

SAS Sonic Pedestal Foot

The steel leg is prevented from contacting the ground by an internal cotter pin, allowing the floor tom to “float” on the elevated “spring” of the rubber foot, eliminating vibration transfer and maximizing resonance.

Floor Tom Isolation Gaskets

The metal components of the floor tom brackets are entirely on the outside of the shell, isolated by the special rubber lift gasket. This releases all pressure from the shell, alleviating vibration loss.

Air Flow Venting

The venting is key to the feel and the overall resonance of the shells. Through painstaking testing, each Chamber Specific approach has led to a formula of multiple vent holes in both Design Lab systems. Toms and bass drums have different combinations of vent holes. These air flow vents are placed at the Nodal line with the lugs, so as to not affect the resonance of the shells.

i The Venus series is available with Chrome fittings only.

The new Venus Series is provided as complete pack, including drum set, a complete hardwarepack, a ZILDJIAN Cymbal Pack plus Throne and Drumsticks. Furthermore, equipped with SONIClear™ Bearing Edge, the full tone of Venus makes you stand out from this price range.

**Practicing, listening, hearing, becoming ...
a Drummer For Life.**

Poplar Shell

9-Ply, 7.2mm Poplar shell offers a full, warm sound.

SONIClear™ Bearing Edge

Allows the head to sit flush prompting ease of tuning, increased shell resonance and optimal tonal clarity.

REMO® UC Drumheads

Drumhead is one of the key elements that impacts the sound. Venus is equipped with REMO® drumheads to ensure the pure tone can be delivered out from the shell.

Mini B-Lug

Inspired by the style of B lugs from Saturn Evolution Series.

TH652 Double Tom Holder

Simple functionality and multi-purpose adaptability.

Venus Series offers 6 exciting finishes to meet drummers' preference.
